

Darwin and Evolution

Further Activity: Insect adaptation

<http://www.darwinproject.ac.uk/learning/7-11/darwin-and-evolution>

How long will activity take?

- 20 mins

What do I need?

- Blank worksheet
- Pens

Using your knowledge of how adaptation works, design an insect that shows how it is adapted to an environment of your choice.

What do I do?

1. Decide on your environment or habitat for your insect.
2. On the blank worksheet, draw an insect that is specially adapted to survive in the environment that you have chosen.

Remember to give your animal a feature that:

- Helps it to catch its food
- Helps it to move
- Protects it

Chosen environment:
Name of Insect:
